

Processing Services

Smiths Advanced Metals

Rev: SAM/info_sheet/market_focus/feb-2022

Page: 1 of 1

Our in-house processing services adds considerable value to our engineering material stockholding.

We process all forms of materials internally at our bulk warehouse in Biggleswade. Our processing services represent a multi-million-pound investment with modern equipment suitable for processing alloys and plastics to tight tolerances.

We combine our stock range and processing services with the power of our bespoke IT platform to provide unrivalled services, which will ultimately improve your supply chain. You will receive engineering material raw materials processed to your exact size requirements, which will get you ahead in the manufacturing process.

Seamless Supply

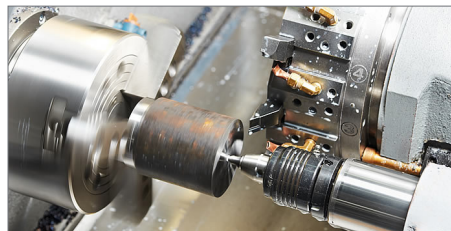

The beauty of our services is that all operations function seamlessly under one roof.

Processing Services:

BAR CUTTING

BAR TURNING

PLATE CUTTING

SHEET CUTTING

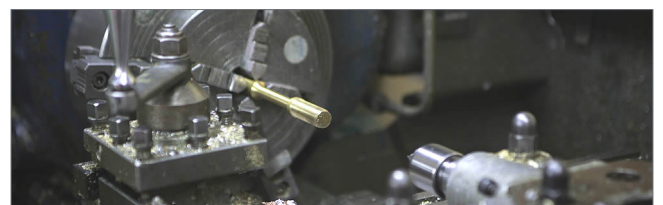

TUBE CUTTING

1ST STAGE ENGINEERING

Did you know that we offer first stage engineering services to speed up your processes?

Our first stage engineering services potentially save you time and money. We specialise in producing turned circles, sawn circles and sawn rings. Our bar turning service also helps you get ahead in the manufacturing process.
